

CLAIMS

1. Item fastener characterized in that it is made in a single piece (1), comprising a central body (2) from where derive at least two lateral projections (3A, 3B) that are
5 extended in opposite directions, displaced outside and present internal grooves (4).
2. Item fastener as claimed in claim 1, in which the internal grooves (4) are lightly rounded (5).
3. Item fastener as claimed in claim 1, in which the
10 projections (3A, 3B) of the single piece (1) have a longitudinally opposite symmetrical shape.
4. Item fastener as claimed in claim 1, in which the single piece (1) has a thickness (6) that varies, preferably, between 1 mm and 5 mm.
- 15 5. Item fastener as claimed in claim 4, in which the predetermined thickness (6) of the single piece is preferably 3 mm.
6. Item fastener as claimed in claim 1, in which the single piece (1) is made of a flexible and non-corrosive
20 material.
7. Item fastener as claimed in claim 6, in which the single piece (1) is preferably made of a polymeric material.

8. Item fastener as claimed in claim 6, in which the single piece (1) is preferably made of wood.
